HTA Faculty Concerns moving to School of Management in CoBA

- HTA faculty have a concern with the interim appointment of Provost to direct the new school. This seems vague and we would like to know for how long and if possible, can the new school faculty get together and elect a Director for the new school.
- Sports Management does not appear to want to join the school of Management & Marketing. HTA faculty have concerns about forcing a program into a school in which they do not want to join. We feel it will negatively impact the cohesiveness and success of the new school. Will a program be forced into a school that receives majority No votes?
